Dr. Petrova delves into the mechanisms of power consolidation, the influence of informal networks, and the role of key individuals in shaping policy outcomes.

Political Institutions and Decision-Making

The book also analyzes the role of political institutions in Russian politics. Dr. Petrova examines the formal structures of government, the interplay between the executive, legislative, and judicial branches, and the influence of regional and local authorities.

She challenges conventional wisdom, arguing that Russian political institutions are not mere facades but play a significant role in shaping policy debates and influencing decision-making. This analysis provides a more comprehensive understanding of the functioning of the Russian political system.

Domestic and Foreign Policy Interplay

One of the key contributions of "New Interpretation of Russian Politics" is its exploration of the intricate relationship between domestic and foreign policy in Russia. Dr. Petrova argues that these two spheres are deeply intertwined and influence each other in profound ways.

She examines how domestic political considerations often drive foreign policy decisions and how, in turn, foreign policy developments impact the domestic political landscape. This analysis offers valuable insights into the motivations and strategies of Russian policymakers.
